Title: Imported loiasis in France: a retrospective analysis of 167 cases with comparison between sub-Saharan and non sub-Saharan African patients.

Version: 1 Date: 25 May 2019

Reviewer: Michel Boussinesq

Reviewer's report:

In this revised version of the paper, the authors have addressed most of the comments I had made. The manuscript is much better indeed. In addition, I understand that the authors cannot address some of them, and I agree that this should not preclude the publication of this paper. I have just two comments to make: 1. I do not understand the sentence "Among patients with both positive microfilaremia and serology, the serology sensitivity was estimated at 69 %." (lines 205-206). The authors should clarify. 2. The authors should delete "due to the parasite lysis" at line 306. Once this has been done, the paper can be accepted (without a new review from me).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
