Reviewer’s report

Title: Determination of the human spine curve based on laser triangulation

Version: 3 Date: 22 October 2014

Reviewer: Oleg Sergiyenko

Reviewer’s report:

Now, for me the modified paper is ok, and their answers to my critics satisfy me in general. However, I can’t stop my sarcasm: they say “we have not found any reported studies using the laser triangulation imaging method to determine the spatial spine curve and validate the method”

I think, it can be useful to recommend read the paper:

It can be helpful because in this paper authors investigate the possibility to reduce the uncertainty of patients self-movements by decrease of scanning time.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
