Reviewer's report

Title: Determination of the human spine curve based on laser triangulation

Version: 3 Date: 1 November 2014

Reviewer: Eric BERTHONNAUD

Reviewer’s report:

I have taken into account the responses of the authors, but do not really understand the interest of measuring the outer curve if it do not provide any indication on the internal curve. This is yet another tool in the determination of external forms. When one wants to make an orthopedic brace or plaster treatment on scoliosis, it is the internal shape of the column that you need. The article is well written, I am not opposed to its publication.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
