Reviewer’s report

Title: Reduced scan range abdominopelvic CT in patients with suspected acute appendicitis - Impact on diagnostic accuracy and effective radiation dose

Version: 0 Date: 15 Oct 2018

Reviewer: Ernest Ekpo

Reviewer's report:

The study compared dose and diagnostic performance of full- and reduced-length CT. However, it is well-established that the DLP, which is a determinant of effective dose (after adjusting for exposure parameters and patient weight) depends on the scan length. Therefore, it is logical that reducing scan length will reduce patient dose. In addition, quite a few studies have explored the impact of reduced scan length to patient dose. Of passing interest but insufficient impact for publication

Methods: Providing radiologists access to the original reports biases the diagnostic performance assessment; Diagnostic performance was reported but no explanation of this was assessed including what was used as the reference standard and how the reports of two radiologists were combined particularly given the well known inter-reader variability

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
Quality of written English

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests
