Reviewer’s report

Title: Clinical and Imaging Manifestations of Primary Cardiac Angiosarcoma

Version: 0 Date: 09 Jan 2019

Reviewer: Magdalena Kostkiewicz

Reviewer's report:

An interesting article, its value would be higher if the authors mentioned whether echocardiography had been performed before and if possible compared the results with echocardiography. It should also be mentioned if there were differences between the image obtained in 64 slice CT and 256 slice CT.

The work qualifies for publication after completing the above informations

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript
