Reviewer's report:

The entitled manuscript "Is MRCP necessary to diagnose pancreas divisum? " in an interesting study, with a clear hypothesis and established objectives. However, needs some improvements and clarification of the clinical importance context and benefits. Furthermore, it is a single center retrospective study. So, it will be necessary an clinical validation of the present study with a multicenter study to increase the relevance and confirm or not these findings. And other important point is about the costs? It will be able to performe worldwide?
