Reviewer’s report

Title: Image quality and pathology assessment in CT Urography: When is the low-dose series sufficient?

Version: 0 Date: 23 May 2019

Reviewer: Dominik Spinczyk

Reviewer’s report:

The article presented for review is a valuable work in the scope of a compromise in the quality of imaging pathological changes and the dose of X-ray radiation absorbed by the patient.

Because this is a retrospective study, the limitations of such a method have been described.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
