Title: Feasibility Evaluation of Micro-Optical Coherence Tomography (μOCT) for Rapid Brain Tumor Type and Grade Discriminations: μOCT Images Versus Pathology

Version: 1 Date: 27 Nov 2019

Reviewer: Ingrid Różyło-Kalinowska

Reviewer's report:

The paper is overall well-organised, novel and interesting.

The major concern is the Conclusions section, which is too long and too general. It could constitute the last paragraph of the Discussion while concise Conclusions derived from the study should be elaborated.

There are some minor typing errors.
