Title: Novel foetal echocardiographic image processing software (5D Heart) improves the display of key diagnostic elements in foetal echocardiography

Version: 1 Date: 24 Nov 2019

Reviewer: Jing Deng

Reviewer's report:

The revised manuscript has improved significantly, in terms of both data presentation and English writing. However, both needs further refinement. Probably due to the large data to deal with, there is still some inconsistency that needs to be addressed. For example, on P1, P8, and particularly on P9, nine/9, instead of correct eight/8, diagnostic views/standard planes remain incorrectly in the manuscript.

Are the methods appropriate and well described?
