Reviewer's report

Title: Altered miRNA expression in pulmonary sarcoidosis

Version: 3
Date: 14 November 2015

Reviewer: Nobuhisa Ishikawa

Reviewer's report:

The authors confirmed selected miRNA important in different lung diseases, but mainly important in idiopathic pulmonary fibrosis, cystic fibrosis asthma or chronic obstructive pulmonary disease. The authors conducted the search for markers which may correlated with the stages of disease development and/or may be associated with clinical features of the disease and its severity. The authors submitted revised manuscript according to reviewer’s comments. I read carefully and consider that this manuscript can be acceptable for publication.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
