Reviewer’s report

Title: COPA syndrome in an Icelandic family caused by a recurrent missense mutation in COPA

Version: 0 Date: 06 Aug 2017

Reviewer: Joseph Shieh

Reviewer's report:

Sulem et al. present an Icelandic family with several individuals with multiple symptoms. Sequencing revealed COPA variant and these studies lend further data for autoimmune interstitial lung, joint and kidney disease. The authors show a family with apparent de novo variant and inheritance. This is a well written manuscript that adds a clinical report with delineation of a family mutation.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
