Reviewer’s report

Title: Exploring digenic inheritance in arrhythmogenic cardiomyopathy

Version: 1 Date: 13 Nov 2017

Reviewer: Jan Jongbloed

Reviewer's report:

The authors keep using the term "protective" for variants identified in carriers of the PKP2 mutation that are (yet) not affected. I would suggest to not use that, as there is no proof that such variants are indeed protective. Remove this from the discussion section (page 19, line9-14) and the methods (page 8, line 20-26) section (I think the terminology is not used in the results section).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
