Title: Identification of two novel null variants of CLN8 by targeted next-generation sequencing: first report of a Chinese patient with neuronal ceroid lipofuscinosis due to CLN8 variants

Version: 1 Date: 14 Aug 2017

Reviewer: Francesco Brancati

Reviewer's report:
Although the authors improved the text there are still some sentences (including the ones highlighted in yellow) which are in need of extensive English editing and/or clarification. The data presented do not add significantly to the current knowledges in the field and the value of NGS in the molecular diagnosis of highly heterogeneous genetic disorders is well established since years.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
