Reviewer’s report

Title: Association of matrix metalloprotease 1, 3, and 12 polymorphisms with rheumatic heart disease in a Chinese Han population

Version: 0 Date: 25 May 2017

Reviewer: Sacide Pehlivan

Reviewer’s report:

The manuscript "Association of matrix metalloprotease 1, 3, and 12 polymorphisms with rheumatic heart disease in a Chinese Han population" was evaluated.

1. The manuscript contains new information to justify publication.

2. Title and Abstract describe clearly the content of the article.

3. The interpretations and conclusions were justified by the results.

4. Adequate references were made to other work in the field.

Decision: Accept.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
