Reviewer’s report

Title: Glutathione S-transferase pi 1 variant and squamous cell carcinoma susceptibility: A meta-analysis of 52 case-control studies

Version: 0 Date: 12 Sep 2018

Reviewer: Shinya Nishio

Reviewer's report:

The manuscript entitled "Glutathione S-Transferase Pi 1 variant and squamous cell carcinoma risk, based on 52 case-control studies" showed negative results in association between GSTP1 gene polymorphism and SCC. All the manuscripts are well written and data analysis was appropriate. This result is negative result but useful data for association study in SCC.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
