Reviewer’s report

Title: Novel compound heterozygote mutations of TJP2 in a Chinese child with progressive cholestatic liver disease

Version: 1 Date: 26 Dec 2018

Reviewer: Teguh Haryo Sasongko

Reviewer's report:

The manuscript is improved and suitable for publication, except that the conclusion should have focused on the value of NGS in clinical diagnosis of hereditary liver disease, rather than suggestion to also consider TJP2 in PFIC cases.

Thus, authors' response on point 4 of my review should be the basis for the conclusion.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
