Reviewer's report:

The author has done an updated meta-analysis about association between KIF1B rs17401966 genetic polymorphism and hepatocellular carcinoma susceptibility. The results are reasonable and the reviewers' comments have been answered.

However, I have some comments as below:

1. Title: "meta-analysis" should be "meta-analysis".

2. Due to the high heterogeneity of the result, a sensitive analysis could be conducted to try to find out the source of the heterogeneity.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
