The article entitles "A cis-eQTL allele regulating reduced expression of CHL3L1 is associated with late-onset adult asthma in Japanese cohorts", is an interesting study in which is notorious the importance of genetic heterogeneity that exists between populations. Minimal suggestions are enlisted below:

1. On line 117. The reference 20 is cited before that 19.

2. On line 234. Only clarify that the genotype to which they refer is the risk.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
