Reviewer’s report

Title: Clinical and whole-exome sequencing findings in two siblings from Hani ethnic minority with congenital glycosylation disorders

Version: 3 Date: 16 Sep 2019

Reviewer: Kent Lai

Reviewer's report:

I think the authors made decent efforts to address the concerns of the previous reviews. The lack of quality samples from a case first seen years ago is understandable, although they should make an effort to contact the patients for further testing in the future. I think the revised manuscript is now suitable for publication as a CASE REPORT based on their responses to the reviewers' concerns.
