Reviewer’s report

Title: Ovarian metastases from ileum cancer in a patient with germline EPCAM gene deletion successfully treated with surgical resection and CAPOX chemotherapy: A case report

Version: 0 Date: 16 Dec 2019

Reviewer: Inge Thomsen Bernstein

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format. Please overwrite this text when adding your comments to the authors. I find the article well written and worthy of publication - it is important to be aware of the hereditary aspect in rare tumor development. I only have two comments. To facilitate understanding of Figures 1 and 2, it is recommended that there in figure 1 is added information on which family members carry the EPCAM mutation and whom is tested negative eg. indicated by a plus or minus sign. In figure 2, I recommend to add an arrow to indicate the tumor location.

Are the methods appropriate and well described? If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls? If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown? If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review? If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
