Reviewer’s report

Title: Identification of differentially expressed miRNAs and mRNAs in synovial of osteoarthritis via RNA-sequencing

Version: 1 Date: 01 Jan 2020

Reviewer: Shahid Khan

Reviewer’s report:

The current revised manuscript by Zhou and colleagues showed significant improvement over the previous version. The author addressed all my concerns in the revised manuscript. In addition, they confirmed few targets identified in RNA-Seq data through qRT-PCR and western blot analysis in additional patients' samples.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
