Reviewer’s report

**Title:** Effects of uremic solutes on reactive oxygen species in vitro model systems in monitoring the renal function

**Version:** 3  **Date:** 25 November 2014

**Reviewer:** Fumihiro Tomoda

**Reviewer’s report:**

Comments to the author

1) The authors should read the author guide for preparation of their manuscript and know the instruction for writing the original paper.

2) The section of “Background” was too long to be understood. The background should be succinct.

3) The author should separate “Results and Discussion” into two sections of “Results” and “Discussion”.

4) In Reference 13, age should be included.

**Level of interest:** An article of limited interest

**Quality of written English:** Not suitable for publication unless extensively edited

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.
