Reviewer's report

Title: Rhabdomyolysis-induced acute kidney injury in a cancer patient exposed to denosumab and abiraterone: a case report

Version: 4 Date: 4 June 2015

Reviewer: Diana Jalal

Reviewer's report:

This is a report of rhabdomyolysis ensuing after treatment with denosumab and abiraterone. No such report exists until now. So the findings are new and of relevance. The manuscript is well-written and the authors provide a reasonable biological background that could explain why this would happen. I recommend acceptance.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
