Title: Outcomes of sustained low efficiency dialysis versus continuous renal replacement therapy in critically ill adults with acute kidney injury: A cohort study

Version: 3 Date: 11 December 2014

Reviewer: Biagio Raffaele Di Iorio

Reviewer's report:

This paper describes a cohort study that compares sustained low efficiency dialysis versus continuous renal replacement therapy in critically ill adults with acute kidney injury.

This is a study that meets all the necessary criteria for publication: the topic is interesting and adds knowledge nephrology, the goal is clear, the methods are congruent, the results described in an appropriate way, the conclusions are clear. The paper can be published as is it.
