Reviewer's report

Title: Trends In The Histopathology Of Childhood Nephrotic Syndrome In Ibadan Nigeria: Preponderance Of Idiopathic Focal Segmental Glomerulosclerosis

Version: 3 Date: 20 July 2015

Reviewer: Larissa Kerecuk

Reviewer's report:

MAJOR REVISIONS
Authors need to define what they mean by 2 NS throughout
Authors need to include some discussion of fact that MCNS current pathophysiology including podocytes and genetic causes
The abstract, especially the methodology, is confusing and needs to be made clearer by explaining exactly when patients were biopsied and the various groups reviewed

MINOR REVISIONS
Authors to ensure that all years are consistent in text - 1980s instead of 80s etc throughout text
Authors to ensure that abbreviations are always defined for the first time they appear in text before using abbreviations

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
