Reviewer’s report:

Thank you for giving me the opportunity of reviewing this paper.

It is a well written and conceived study, with only minor concerns in my opinion.

1. It is not completely clear how model 2 was constructed: the authors reported that the included variables were selected according to changes in the adjusted R-squared from model 1. However, these values are not available. Please included these values, at least in Supplementary materials.

2. Please specify adjusted R-squared and P-values of model 2 and of logistic regression
