Reviewer’s report

Title: Unexpected presentation of allograft dysfunction triggered by Page kidney phenomenon immediately after kidney transplantation: A case report

Version: 0 Date: 23 Jan 2018

Reviewer: Jiri Fronek

Reviewer's report:

This is nicely written paper, PK is rare complication which may cause the graft loss. Ideally, this complication should be identified on the ultrasound scan and percuraneous drainage of the subcapsular hematoma can solve the issue. The approach described in the paper is also acceptable.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript
