Reviewer's report:

The authors have modified the paper into an acceptable form. I believe the article is ready for publication.

I have only 2 minor comments:

1. It would be nice for the authors to describe how they performed the SLED. How many hours per session? What dialyzer? What blood flow? etc.
2. Under results, page 7. "Moderate (Hb: 8-9.9 g/dl) to mild (10-12 g/dl)" should be changed to "Mild (10-12 g/dl) to moderate (8-9.9 g/dl)"

Are the methods appropriate and well described?
