Reviewer’s report

Title: Renal limited AL amyloidosis - a diagnostic and management dilemma

Version: 1 Date: 12 Jul 2018

Reviewer: Suchin Worawichawong

Reviewer's report:

The additional information could not convince the diagnosis of AL-Amyloid because resistant to KMnO4 treatment Congo red staining is not a diagnostic criteria only for AL-Amyloid but it can be seen in non-AA amyloid.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
