Reviewer's report

Title: Thrombospondin type-1 domain-containing 7A-associated membranous nephropathy after resection of rectal cancer: a case report

Version: 0 Date: 06 Nov 2018

Reviewer: Andrea Angioi

Reviewer's report:

I read with interest this paper from Shinya Taguchi et al on a case of Colon cancer expressing THSD7A and a membranous GN THSD7A positive. The research question is interesting, the case is well explained, discussion is fair, as well as conclusions. English is overall correct. I think it can be suitable for BMC nephrology as it is. The only issue is the quality of the images, that can be improved.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
