Reviewer’s report

Title: The Conundrum of Postpartum Thrombotic Microangiopathy: Case Report and Considerations for Management

Version: 2 Date: 31 May 2018

Reviewer: Anupama Kaul

Reviewer's report:

The case report itself mentions the clinical diagnosis from the beginning that it was a case of Preeclampsia with malignant hypertension and all the findings were suggestive of the same post partum it looks like TMA but TMA is presented with uneventful pregnancy which was not the case in your patient .PLEX was not required in this case and could responded without that also with control of hypertension post partum

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
