Reviewer’s report

Title: Subcortical White Matter Infarcts Predict of 1-year Outcome of Fatigue in Stroke

Version: 2
Date: 5 September 2014
Reviewer: Kittisak Sawanyawisuth

Reviewer’s report:

There are some concerns that the authors may need to address as follows:

1. Describe the stat methods about multivariate logistic analysis as shown on table 3. What factors were put in the model? How? And, the odds ratios should be called adjusted odds ratio.

2. The authors need to discuss how fatigue different from depression? Which is cause and effect? And, also the results of this study between fatigue vs depression.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
