Reviewer's report

Title: Longitudinal randomised controlled trials in rehabilitation post-stroke: a systematic review on the quality of reporting and use of baseline outcome values

Version: 1 Date: 8 May 2015

Reviewer: Jos Twisk

Reviewer's report:

The authors did a nice job in revising their paper. The responded well to all my earlier questions and comments. There is one (major) thing left. They really should give some more detail regarding the example dataset and they should report the results of the analyses they performed on the example dataset in one or two tables.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
