Reviewer’s report

Title: Spinal cord hemorrhage in a patient with neurosarcoidosis on long-term corticosteroid therapy. Case report.

Version: 3 Date: 15 March 2015

Reviewer: Mirjam R Heldner

Reviewer’s report:

Pegat et al. report an interesting case of a patient with neurosarcoidosis on long-term corticosteroid therapy and with spinal cord hemorrhage.

I think this to be an interesting manuscript of some importance and good quality. The findings are interesting, rarely seen and the manuscript is well written and concise.

Major Compulsory Revisions

I suggest, that the authors discuss the characteristics of spinal cord hemorrhage more in detail.

There are many references on neuro-/sarcoidosis cited. I suggest, that the authors additionally cite these references to add more references focusing on spinal cord hemorrhage:

Minor Essential and Discretionary Revisions

None.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests besides I am interested in this medical topic of spinal cord hemorrhage.
