Reviewer's report

**Title:** Morphometric Variability of Neuroimaging Features in Children with Agenesis of the Corpus Callosum

**Version:** 5  
**Date:** 29 March 2015

**Reviewer:** ATHANASIA ANASTASIOU

Reviewer's report:

Thank you for trusting me with the review of this manuscript, which I found quite interesting.

I think that there are three "Minor issues not for publication" which at the following points:

a) Abstract/DESCRIPTION/2nd line, the word "but" should be omitted
b) Abstract/DESCRIPTION/3rd line, the word "and" should be omitted
c) METHODS/3rd paragraph, the word "intrahemispheric" should be replaced by "interhemispheric"

As I mentioned above, the manuscript is quite interesting, the question posed by the authors well defined, the methods are appropriate and well described, the discussion and conclusions well balanced and adequately supported by the data. The authors clearly acknowledge any work upon which they are building and the writing is acceptable.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
