Reviewer’s report

Title: Injuries of neural tracts in a patient with CADASIL: A diffusion tensor imaging

Version: 1 Date: 23 June 2015

Reviewer: Megha Megha Dhamne

Reviewer’s report:

1. Major compulsory revisions – none

2. Minor essential revisions
   Line 20- We report on a patient – Can omit “on”
   Line 75 – may be written as – At a local “neurology” clinic he was diagnosed “with” multiple lacunar infarcts and was prescribed aspirin.
   Line 80- may revise as - However, he had no history of migraine, and his father had suffered from stroke which was not accurately diagnosed.

3. Discretionary revisions – none

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
