Reviewer's report

Title: Anomalous vascularization in a Wnt medulloblastoma: a case report

Version: 0 Date: 21 Apr 2016

Reviewer: Martin McCabe

Reviewer's report:

The authors present an interesting case of WNT medulloblastoma with dysplastic, anomalous, thick-walled blood vessels and evidence of haemorrhage on MRI scan, together with a brief discussion of the role of the WNT pathway in CNS angiogenesis and the development of the blood brain barrier. I would like to have seen some more description in the text of the histological findings, particularly as they relate to the dysplastic angiogenesis that the authors imply to be responsible for the haemorrhagic state of this case at diagnosis.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
