Reviewer's report:

Dear authors,

As a peer reviewer, I have read your manuscript NURL-D-16-00571R2 entitled "Lumbar Puncture as Possible Cause of Sudden Paradoxical Herniation in Patient with Previous Decompressive Craniectomy : Report of Two Cases". You have revised your manuscript upon the previous reviewers' comments. This is a valuable paper, I agree that it can be published in this journal. However, there are still some minor language defects such as spelling( for example: "athmospheric")or expression(eg:"in out paper report" in discussion ) need to be revised. And also, in your conclusion, I suggest you had better add" CSF drainage during lumbar puncture should be in small volume for patients with DC".

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
