Title: Subarachnoid small vein occlusion due to inflammatory fibrosis—a possible mechanism for cerebellar infarction in cryptococcal meningoencephalitis: a case report

Version: 0 Date: 10 Apr 2017

Reviewer: Marc Alain Babi

Reviewer's report:

in this study, the authors describe a case of fatal cerebral venous thrombosis in association with w/ Cryptococcal meningitis. I recommend against the publication of this manuscript because of the following considerations

1. the quality of written English is inappropriate for publication in a peer-reviewed scientific journal unless it is extensively edited

2. The introduction is very lacking and does not set forth an appropriate transition into the actual case

3. Cerebral venous thrombosis has been extensively described in meningitis, and I do not see how this case report will contribute to any further of what is already known.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
