Title: Neuroprotective effect of neuroserpin in non-tPA-induced intracerebral hemorrhage mouse models

Version: 0 Date: 17 Jul 2017

Reviewer: Francisco Alvarez

Reviewer’s report:

The Authors present an interesting experimental work, showing antiinflammatory properties of neuroserpin.

The method is well explained and the conclusions seem to be supported by data.

I only have a question: what could be the role of neuroserpin in management of haemorrhagic stroke in humans?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
