Reviewer’s report

Title: MR imaging features of benign retroperitoneal paragangliomas and schwannomas

Version: 1 Date: 28 Aug 2017

Reviewer: tianming qiu

Reviewer's report:
For my second question, as all imaging features are based on tumor pathology, is there any relationship between imaging features and pathological findings? What's difference between these two tumors. This is quite important when analyzing and describing the imaging features. This part should be addressed more.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
