Reviewer’s report

Title: Isolated and repeated stroke-like episodes in a middle-aged man with a mitochondrial ND3 T10158C mutation: a case report.

Version: 0 Date: 28 Jul 2017

Reviewer: Yasmin Ali O'Keefe

Reviewer’s report:

Overall well written paper, interesting case. I enjoyed the discussion the most as it was a good refresher of the pathophysiology and causative factors of this disease process. You may do well to a little more prominently highlight the preferential predilection of mitochondrial disease to present in pediatric demographics (perhaps in the abstract) to catch the reader's attention as to why this is a pertinent case report, but otherwise overall well done.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
