Reviewer’s report

Title: Predictors of post-stroke body temperature elevation

Version: 0 Date: 12 Jun 2017

Reviewer: Marc Alain Babi

Reviewer's report:

Overall well written manuscripts, and I comment the authors for this very important study that will shed additional light on this important topic. However, I do have few recommendations:

1. I recommend to the authors to have their manuscript reviewed by a native English speaker. At some point, it does become difficult to follow several sentences

2. Would expend on the discussion and the limitation of their studies.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
