Title: SCL20A2 mutation presenting with acute ischemic stroke: a case report

Version: 0 Date: 14 Nov 2017

Reviewer: Giovanni Maria Puddu

Reviewer’s report:

The Authors report a Case Report about a case of ischaemic stroke as first manifestation of Primary familiar brain calcification (PFBC). Although the features of PFBC and the underlying mutation (SLC20A2) have already been described, this paper depicts an original clinical presentation of the disease, and an extensive description of the ?state of art? about PFBC. I only noticed some sentences that are not really clear in grammar:

1. Page 5, line 82: the sentence starts with ?And?, and sounds grammatically not clear.

2. Page 7, line 141: the sentence starts with ?And?, and sounds grammatically not clear.

3. Page 9, line 177: ?may attribute to? could be changed in ?may be attributed to?

Are the methods appropriate and well described?
