Reviewer’s report
Title: High frequency of the TARDBP p.M337V mutation among south-eastern Chinese patients with familial amyotrophic lateral sclerosis

Version: 1 Date: 06 Jan 2018

Reviewer: Francisco Gondim

Reviewer's report:
Please review language again, since there are still some linguistic problems, e.g. A physical examination could be replaced by neurological exam.
Ideally I would like to review a final version without corrections, in addition to this corrected view, so I could have a better grasp of the text, since there are too many text corrections at this point.
