Reviewer’s report
Title: A survey of subjective constipation in Parkinson's disease patients in Shanghai and literature review

Version: 0 Date: 18 Sep 2017

Reviewer: Doreen McClurg

Reviewer's report:
Thank you for this interesting paper. Constipation is often an overlooking symptom. My main point is the lack of explanation and detail of the survey document itself and any questions it contained. How many questions, how long did it take people to complete, were they all completed face to face, was any qualitative data collected as well? It would have been better to be more clear on these things.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
I am able to assess the statistics
