Reviewer’s report

Title: Subarachnoid hemorrhage after transient global amnesia caused by cerebral venous congestion: case report

Version: 1 Date: 11 Mar 2018

Reviewer: Bum joon Kim

Reviewer’s report:

The authors well revised their manuscript according to my previous comments.

I do mostly agree to their opinion, but suggest to tone down mentioning on the pathomechanism of DWI lesions presented in TGA patients.

Some researchers demonstrated that PFO are more frequent in TGA patients, previously, and still the pathomechanism is not conclusive.

Therefore, I would recommend the authors to add that right to left shunt (paradoxical embolism) may underlie in the pathomechanism of TGA.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
