Title: Isolated Subdural Hematoma Secondary to Dural Arteriovenous Fistula: A Case Report and Literature Review

Version: 0 Date: 06 Jun 2018

Reviewer: Katharina Busl

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

The authors present a nice review on the existing described cases of isolated SDH caused by a DAVF. The case they present is, however, neither novel or does have any novel aspects. In order to make this review more substantial, the authors should add information on the individually reviewed papers on what prompted the respective authors to investigate with DSA. The authors do present a list of suggested criteria, however these are not supported by their data - this suggestion may also lead in a high number of unnecessary DSAs, so this would have to be taken in consideration and discussed. The manuscript furthermore does not elucidate the potential role of other advanced imaging (MRI/A/V) in detection of DAVF in such cases.

Suggestion to focus on one specific conclusion rather than delivering a bit of a review on treatment/diagnoses etc. that all is not particularly comprehensive.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
