Title: Selected serum cytokines and nitric oxide as potential multi-marker biosignature panels for Parkinson disease of varying durations: A case-control study

Version: 1 Date: 12 Mar 2019

Reviewer: Johannes Schlachetzki

Reviewer’s report:

The authors have sufficiently addressed my concerns.

Minor points:

Figure 1: The x-axis should nevertheless be labeled.

Instead of "disease control", the authors may want to think about other terms, e.g., as they wrote in the abstract as "other neurological disorders" and is more specific than "disease control".

In the acknowledgements, please remove the word "normal", instead just use "Controls".

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
