Reviewer's report

Title: Effects of the blood urea nitrogen to creatinine ratio on haemorrhagic transformation in AIS patients with diabetes mellitus

Version: 2 Date: 27 Jan 2019

Reviewer: Serrati Carlo

Reviewer's report:

Since it is hypothesized that a high BUN/Cr increases the risk of HT probably increasing the prevalence of cerebrovascular disease of small vessels, why did not you include in the statistical analysis the degree of leukoaraiosis? Please specify the reason.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
